

Pink shrimp *Pandalus borealis* PANDALIDAE

Size: up to 14 cm

Peculiarities: long and thin rostrum, curved upward and dentated (1); second pair of legs longer, with small claws (2); spine on the third abdominal segment (3).

Habitat: from 5 to 500 fathoms.

Food: small crustaceans

Enemies: most of the predatory fishes that frequent the same habitat (cod, halibut, white hake, squid).

Relation to man: important commercial fishery in the northern part of the gulf
